Participate in rising markets up to your Cap Rate. The Shield Rate (level of protection) would not be fully accrued until the term end date. If there is negative index performance at the end of a term, the issuing insurance company will absorb losses up to the level of protection for the selected Shield Option and your account value will be reduced by any negative performance beyond the level of protection. If you do not elect the Fixed Account, you could see a substantial loss if the index declines more than your level of protection.

Interest rates, specified rates, spreads, participation rates, and caps are based on product/contract features (including death benefit options) and are declared by Brighthouse Financial at its discretion. Subsequent rates may be higher or lower than the initial rates and may differ from those used for new contracts or for contracts issued at different times. Morgan Stanley's Guaranteed Minimum Indexed Interest Cap is [2.00% for 1-2 year point-to-point, 3.00% for 3-4 year point-to-point, and 4.00% for 5-6 year point-to-point] while the surrender charge percentage exceeds 0% and 1.00% thereafter.

Note: Allocations to a Shield Option are not invested directly in an index.

New Money Rate Lock Procedure: The interest rates for Cap Rate and Fixed Account are guaranteed for 60 days from the date the application is signed if the application is received by Brighthouse Financial Annuity Service Center within 7 calendar days of the application signed date. If the application is received after 7 calendar days, you will receive new guaranteed interest rates for Cap Rate and Fixed Account for 60 days at the then-current rates. If your contract is issued beyond the 60-day time period, you will be given the then-current rates that are applicable for your Shield Option(s) as of the contract issue date.

¹ Prior to the term end date, the accrued Cap Rate or Step Rate will be the applicable rate multiplied by the greater of: (60 days multiplied by the total duration of the term in years plus 180 days) divided by the total number of days in the term; or the total number of days elapsed since the beginning of the term divided by the total number of days in the term.
