A Valuable Tool for Retirement Portfolios

ANNUITIES | SINGLE PREMIUM DEFERRED

Brighthouse Shield®
Level Annuity

Performance Lock Feature

Brighthouse Shield® Level Select 6-Year Annuity, Brighthouse Shield® Level Select 3-Year Annuity, and Brighthouse Shield® Level Select Advisory Annuity are part of the Shield annuity suite of single premium deferred annuity products, collectively referred to as "Shield® Level annuities" or "Shield® annuities."

Performance Lock is only available with Brighthouse Shield Level Select 6-Year Annuity, Brighthouse Shield Level Select 3-Year Annuity, and Brighthouse Shield Level Select Advisory Annuity, and availability of this feature may vary by state or firm.

Important Terms and Definitions

Shield Option	Each Shield Option has an associated term, Index, Shield Rate (level of protection), and either a Cap Rate or Step Rate. The Performance Lock feature is available only with Shield Options with a Cap Rate. Note: This feature is defined on the following pages.
Term	The number of years the Shield Option is in effect.
Index	A choice of three well-known market indices to track performance: <ul style="list-style-type: none"> • S&P 500® Index^A • Russell 2000® Index^B • MSCI EAFE Index^C
Shield Rate¹	The amount of any negative index performance absorbed by Brighthouse Financial at the end of the term (e.g., 10% level of protection).
Cap Rate²	The maximum rate that can be earned for the term. This rate will vary by Shield Option.
Step Rate²	A predetermined percentage of growth credited to the account if the performance of the chosen index is either flat or up at the end of the term. In exchange for this added certainty, Step Rates may be lower than Cap Rates with the same term, index, and level of protection. This rate will vary by Shield Option. ^{2,3}
Index Value	The published closing value of an index on any given business day.
Index Performance	For any Shield Option in which a Performance Lock has taken effect, index performance is the percentage change in the index value measured from the term start date to the date on which the Performance Lock takes effect.
Interim Value³	The value of each Shield Option calculated on any business day prior to the end of the term. The Interim Value is the amount available for: <ul style="list-style-type: none"> • Partial withdrawals or full surrenders (reduced by withdrawal charge, if applicable) • Annuitization • Death benefit

¹ Please note that the Shield Rate is accrued daily and fully accrues on the term end date. If a withdrawal is taken from the contract prior to the term end date, negative market performance could lead to a loss if it exceeds the accrued Shield Rate. See the prospectus for further details.

² It is important to note that Step Rates are generally lower than the Cap Rates. If index performance is equal to or greater than zero but less than the Step Rate, and you chose a Cap Rate for your Shield Option, the Performance Rate adjustment will be lower than it otherwise would have been if you had chosen a Step Rate. Alternatively, if index performance is positive and exceeds the Step Rate, and you chose a Step Rate for your Shield Option, the Performance Rate adjustment will be lower than it otherwise would have been if you had chosen a Cap Rate.

³ Each business day, we assign a value to each Shield Option, which is known as Interim Value. This value also represents the amount you can withdraw from each of your Shield Options on any day before the term end date. The Shield Rate along with the Cap Rate or Step Rate (depending on the Shield Option chosen) accrue daily throughout the term and will not be fully accrued until the term end date, which will affect your Interim Value. Additionally, Interim Value is used to measure the impact of a partial withdrawal on the remaining investment amount in a Shield Option. The amount of a partial withdrawal, and any applicable withdrawal charges, will reduce the investment amount for each Shield Option proportionally and may adversely impact the investment amount in your Shield Option and any future amounts available for withdrawal. If a Locked Index Value has taken effect, you may receive less than you would have received had you not exercised a Locked Index Value due to the Performance Lock Factor.

Another Tool to Help Reach Retirement Goals

A Brighthouse Shield[®] Level Annuity uses a portion of retirement assets to participate in market growth opportunities with a level of downside protection other investment vehicles may not provide. Performance Lock is an added feature that allows you more control over a part of your portfolio for the remainder of the term by locking in growth and protecting assets from future market volatility.⁴

Understanding the Performance Lock Feature

Our Performance Lock feature, which is available on Shield Options with a Cap Rate, allows you to lock positive index performance once during your term. Once the Performance Lock takes effect, it provides certainty for a portion of your portfolio and protection from future volatility. This allows your financial professional to help guide you toward your retirement goals with one less variable to consider.

⁴ Once the Performance Lock takes effect, a Performance Lock Factor applies in the calculation of Interim Value prior to the end of the term and the calculation of the investment amount at the end of the term. The Performance Lock Factor will result in a reduction of the Interim Value, and the client may receive less than they would have received had the Performance Lock not been in effect. The index value of the selected index may increase above the Locked Index Value; however, this higher index value will not be utilized in the calculation of your investment amount at the end of the term. Performance Lock is not available on Shield Options with a Step Rate. Performance Lock is only available for contracts issued by Brighthouse Life Insurance Company, based on applications received on or after 08/02/2021. This feature is not available in New York.

How Performance Lock Works

- On any business day during a term, you may choose to lock the closing index value of an applicable Shield Option, as long as it is higher than the index value at the beginning of the term. The Locked Index Value will be used for the remainder of the term to calculate the index performance for the Shield Option.
- Once the Performance Lock has taken effect, a Performance Lock Factor is applied to the Interim Value each day during the term and is used in the calculation of the investment amount at the term end date.⁵
- The Performance Lock Factor will vary based on term length.

	1-Year Term	3-Year Term	6-Year Term
Performance Lock Factor	97%	96%	95%

The Performance Lock can take effect one time during a term. Please keep in mind the following information:

- The Locked Index Value is the closing index value on the business day in which the Performance Lock takes effect.
- Any Performance Lock request received in good order after the close of business will be considered received on the next business day.
- The Performance Lock is irrevocable once it has taken effect.

⁵ In any event, the Interim Value of a Shield Option after Performance Lock takes effect will not be less than the investment amount at the beginning of the term reduced for any withdrawals.

Benefits of Locking Index Performance

Markets can be unpredictable. That's why Performance Lock allows you to lock in the positive index performance of your Shield annuity once during your term. The benefits of locking in index performance through the Performance Lock feature are:

- The potential for your Interim Value to increase as your Cap Rate continues to accrue⁶
- The certainty it provides for a portion of your portfolio as well as protection from future volatility for the remainder of your term
- The ability to stay in your Shield Option for the remainder of the term or transfer the Interim Value on any contract anniversary prior to the end of the term

If applicable, Performance Lock can be activated by contacting Brighthouse Financial.

⁶ The Cap Rate is accrued daily and fully accrues on the term end date. For example, halfway through the term, half of the Cap Rate that applies for the entire term would be accrued. If you lock index performance above the accrued Cap Rate, your Interim Value will continue to grow. If you lock index performance below the accrued Cap Rate, you will not experience any additional growth throughout the remainder of the term.

Let's Look at Some Examples

Meet Gabriela

Gabriela is single and 60 years old. She purchased a Shield annuity to add the opportunity for growth and a level of protection to her portfolio.

Her Shield annuity features:

Term	Cap Rate	Shield Rate	Premium
6-years	75%	25%	\$100 _K

The markets since the start of the term have been volatile and Gabriela is worried that her retirement portfolio will be negatively affected. She decides to meet with her financial professional and they agree to exercise the Performance Lock feature, which went into effect on the contract's fourth anniversary.

Hypothetical example for illustrative purposes only.

Locking in Gains During Positive Index Performance

It's a good idea to work with a financial professional to determine whether and when the Performance Lock feature should be in effect on your Shield annuity. While you will be locking in positive index performance, you may also miss out on additional index growth throughout the remainder of the term. Additionally, you are forgoing any potential future growth if you lock in index performance below the accrued Cap Rate.

Performance Lock Exercised on 4th Contract Anniversary

Anniversary	Index Value	Index Performance	Locked Index Performance	Accrued Cap Rate	Performance Rate	Interim Value	Performance Lock Factor
0	1,000	–	–	–	–	\$100,000	–
1	1,300	30%	–	12.50%	12.50%	\$112,500	–
2	1,600	60%	–	25.00%	25.00%	\$125,000	–
3	1,500	50%	–	37.50%	37.50%	\$137,500	–
4	1,750	75%	75%	50.00%	50.00%	\$142,500*	95%
5	1,900	90%	75%	62.50%	62.50%	\$154,375*	95%
6	1,350	35%	75%	75.00%	75.00%	\$166,250*	95%

* After a Performance Lock, the Interim Value is adjusted by a Performance Lock Factor of 95% through the end of the term.

Without Performance Lock

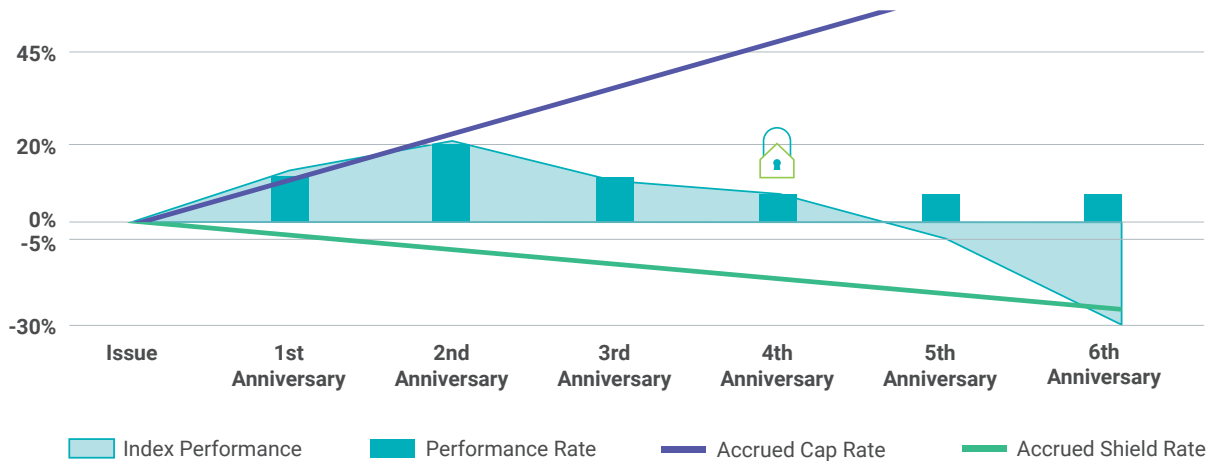

Anniversary	Index Value	Index Performance	Locked Index Performance	Accrued Cap Rate	Performance Rate	Interim Value	Performance Lock Factor
0	1,000	–	–	–	–	\$100,000	–
1	1,300	30%	–	12.50%	12.50%	\$112,500	–
2	1,600	60%	–	25.00%	25.00%	\$125,000	–
3	1,500	50%	–	37.50%	37.50%	\$137,500	–
4	1,750	75%	–	50.00%	50.00%	\$150,000	–
5	1,900	90%	–	62.50%	62.50%	\$162,500	–
6	1,350	35%	–	75.00%	35.00%	\$135,000	–

As you can see in this example, by exercising the Performance Lock feature, Gabriela was able to lock in index performance of 75%. This ensured that she experienced continued growth for the remainder of her term, even though the index performance declined to 35% at the completion of the term.

Limiting Losses During Market Volatility

While the Performance Lock feature offers an added layer of certainty in up markets, the protection it can provide in down markets is also a key benefit. In the event of a market downturn, exercising the Performance Lock can help prevent future losses. However, this can also mean missing out on future growth should market volatility subside.

Remember, Performance Lock can only take effect if the index value is higher than it was on the date the term began.

Performance Lock Exercised on 4th Contract Anniversary

Anniversary	Index Value	Index Performance	Locked Index Performance	Accrued Cap Rate	Accrued Shield Rate	Performance Rate	Interim Value	Performance Lock Factor
0	1,000	–	–	–	–	–	\$100,000	–
1	1,150	15%	–	12.50%	4.17%	12.50%	\$112,500	–
2	1,200	20%	–	25.00%	8.33%	20.00%	\$120,000	–
3	1,110	11%	–	37.50%	12.50%	11.00%	\$111,000	–
4	1,070	7%	7%	50.00%	16.67%	7.00%	\$101,650*	95%
5	975	-2.50%	7%	62.50%	20.83%	7.00%	\$101,650*	95%
6	700	-30%	7%	75.00%	25.00%	7.00%	\$101,650*	95%

* After a Performance Lock, the Interim Value is adjusted by a Performance Lock Factor of 95% through the end of the term.

Without Performance Lock

Anniversary	Index Value	Index Performance	Locked Index Performance	Accrued Cap Rate	Accrued Shield Rate	Performance Rate	Interim Value	Performance Lock Factor
0	1,000	–	–	–	–	–	\$100,000	–
1	1,150	15%	–	12.50%	4.17%	12.50%	\$112,500	–
2	1,200	20%	–	25.00%	8.33%	20.00%	\$120,000	–
3	1,110	11%	–	37.50%	12.50%	11.00%	\$111,000	–
4	1,070	7%	–	50.00%	16.67%	7.00%	\$107,000	–
5	975	-2.50%	–	62.50%	20.83%	0.00%	\$100,000	–
6	700	-30%	–	75.00%	25.00%	-5.00%	\$95,000	–

This example shows the versatility of the Performance Lock feature during a market downturn. In this case, the Performance Lock takes effect on Gabriela's fourth contract anniversary, guarding against future losses and locking in index performance of 7% for the remainder of the term, even though the index performance declines to -30% at the completion of the term.

Curbing Gains in Up Markets

While locking in positive index performance can ensure certainty for capturing future growth, exercising the feature prior to a market upswing could lead to missing out on additional index growth for the remainder of the term.

Performance Lock Exercised on 4th Contract Anniversary

Anniversary	Index Value	Index Performance	Locked		Accrued Cap Rate	Performance Rate	Interim Value	Performance Lock Factor
			Index Performance	Index Performance				
0	1,000	–	–	–	–	\$100,000	–	
1	1,300	30%	–	–	12.50%	\$112,500	–	
2	1,600	60%	–	–	25.00%	\$125,000	–	
3	1,500	50%	–	–	37.50%	\$137,500	–	
4	1,650	65%	65%	65%	50.00%	\$142,500*	95%	
5	1,500	50%	65%	65%	62.50%	\$154,375*	95%	
6	1,800	80%	65%	65%	75.00%	\$156,750*	95%	

* After a Performance Lock, the Interim Value is adjusted by a Performance Lock Factor of 95% through the end of the term.

Without Performance Lock

Anniversary	Index Value	Index Performance	Locked		Accrued Cap Rate	Performance Rate	Interim Value	Performance Lock Factor
			Index Performance	Index Performance				
0	1,000	–	–	–	–	\$100,000	–	
1	1,300	30%	–	–	12.50%	\$112,500	–	
2	1,600	60%	–	–	25.00%	\$125,000	–	
3	1,500	50%	–	–	37.50%	\$137,500	–	
4	1,650	65%	–	–	50.00%	\$150,000	–	
5	1,500	50%	–	–	62.50%	\$150,000	–	
6	1,800	80%	–	–	75.00%	\$175,000	–	

The example above shows how growth opportunities could be missed if the Performance Lock feature is exercised before additional index growth is achieved. In this case, Gabriela exercises the Performance Lock feature on her fourth contract anniversary, locking in index performance of 65%. Although exercising the Performance Lock when she did protects her from the market downturn in year 5, it also limits the gains she receives in year 6 to 65% instead of the 75% she would have received if she had never exercised the Performance Lock feature.

Find Out More

The Performance Lock feature can help you lock in growth for the remainder of the term and avoid the potential losses market volatility can cause. You should discuss with your financial professional whether exercising the Performance Lock feature on your Shield annuity is the right move.

If selected, Performance Lock can be activated by contacting Brighthouse Financial. For more information on Shield annuities, go to brighthousefinancial.com/products/shieldannuities.

These examples are not representative of past or future performance for any Shield Option. Actual performance may be greater or less than what is shown. Performance may differ due to the Cap Rate or Step Rate and level of protection. Shield annuities do not invest directly in any index.
